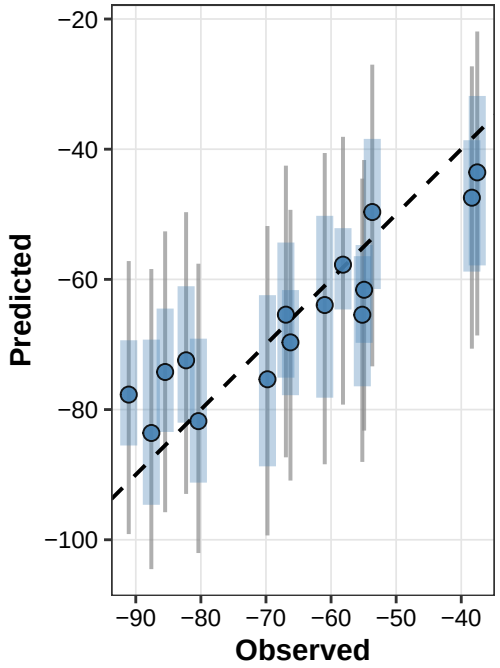
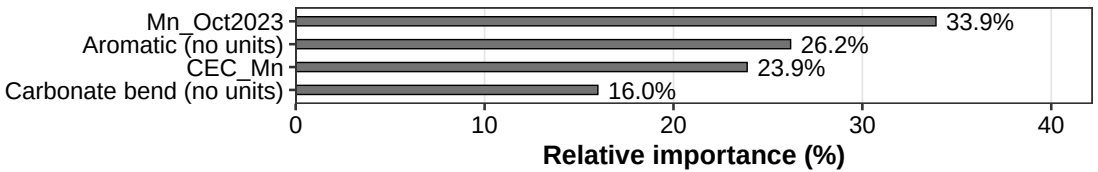
fPOM .¹4C (‰)

Best model: d14C_2026_fPOM_bestmod



Standardised posterior mean coefficients

$$y = -0.00 + 0.86 \times \text{Mn_Oct2023} + 0.67 \times \text{Aromatic (no units)} - 0.61 \times \text{CEC_Mn} - 0.41 \times \text{Carbonate bend (no units)}$$

Relative importance of predictors


Absolute standardised posterior mean coefficients: fPOM .¹4C (‰)
